SUMMARY

With over 1 years of experience as a full-stack developer, I specialize in front-end development using React.js and Next.js, leveraging CSS libraries like Tailwind to create responsive and dynamic user interfaces. On the backend, I utilize Python with frameworks such as FastAPI and Django to build robust and scalable applications. Additionally, I have proficiency in web scraping using Selenium, enabling me to extract and manipulate data from various websites.

EXPERIENCE

Backend Developer

Artilence

📅 05/2024 - Present   📍 Lahore, Pakistan

- **Python**: Developed scripts and applications using Python.
- **FastAPI**: Utilized FastAPI for building high-performance web APIs.
- **Django**: Built and maintained web applications using the Django framework.
- **Web Scraping**: Implemented web scraping solutions using Selenium.
- **Docker**: Gained experience in containerizing applications using Docker.
- **Redis**: Acquired basic knowledge and experience in using Redis for caching and data storage.

Front End Developer

SageByte

📅 01/2024 - 11/2023   📍 Toronto, Canada

- Developed responsive web applications using React.js and Next.js
- Implemented designs with Tailwind CSS and other CSS libraries.
- Created responsive and user-friendly web designs.
- Collaborated with team members to design and develop dynamic web applications.
- Worked on code optimization and debugging to ensure efficient and maintainable code.

EDUCATION

Bachelor of Science in Computer Science

GC University Faisalabad

📅 09/2023 - 01/2019   📍 Faisalabad, Pakistan

Intermediate in Computer Science

Govt Islamia College Faisalabad

📅 06/2017 - 06/2019   📍 Faisalabad, Pakistan

Matric

Government Crescent Model School

📅 2015 - 2017   📍 Faisalabad, Pakistan

PROJECTS

🖥 Koachassist

Koach Assist was founded to streamline logistics and operations in high school athletics. We serve coaches and administrators, helping them find their next job.

🖥 Profile Hub

Centralize your user information and social links in one shareable profile card for seamless connections.

🖥 Github User Finder

I created a project in Next.js where users could input a GitHub username to retrieve information about the corresponding user's profile.

🖥 PDF to Text Converter

I developed a project allowing users to upload PDF files, display the text content of the PDF below the upload interface

🖥 Web Scrapper

I developed web scrapper of some job websites like linkidln , Indeed , Glassdoor , FlexJobs and some other
